Summary

Software Engineer with a background in high-growth account management and data strategy. Expert in TypeScript, Python, and Next.js, with 2+ years of experience architecting scalable full-stack solutions and \$100k+ revenue-generating features. Proven ability to leverage 6+ years of professional experience to bridge the gap between complex stakeholder requirements and high-performance technical execution.

Work Experience

Software Engineer, Goodcall Technology(Contract),

Feb'25 - Present

- Developed and implemented UI in NextJs using Typescript components based on Figma wireframes, improving website engagement by 40% through data-driven UX optimizations
- Architected and led the delivery of custom product features by performing rigorous requirement analysis, directly increasing platform retention and adoption across high-value enterprise accounts
- Refactored platform architecture to decouple core services from Twilio, engineering a multi-provider SIP integration layer; this expanded API compatibility, resulting in \$100,000 in new revenue and 5+ enterprise sign-ups

Software Engineer, WeBuild Solutions(Contract)

Sep' 24 - Present

- Architected robust data models using Prisma ORM and PostgreSQL, tailoring schema designs to meet diverse client use cases and ensure data integrity
- Engineered end-to-end features, developing scalable backend services and responsive front-end components to fulfill all defined user stories.
- Implemented Role-Based Access Control (RBAC) principles to secure application layers and manage complex user permission levels.
- Enhanced software reliability by integrating comprehensive testing suites, including Cypress for end-to-end workflows and dedicated backend unit testing
- Refactored core services to include Redis caching, rate limiting, and pagination, significantly improving application scalability for high-traffic endpoints

Software Engineer, HiTide Capital(Contract)

May' 24 – Aug' 24

- Revamped front end application written in nextJS to meet marketing campaign needs using Figma specs, resulting in a 34% surge in sign-up rates
- Resolved critical bugs throughout the application and added new features and firebase integrations to the nest js backend leading to a notable uptick in feature integrations
- Refactored stale code modules to enhance code readability, reusability and security to enhance the applications performance and modularity

Software Engineer, AFreeBird.org(Volunteer)

Feb' 23 – Jun' 23

- Spearheaded the development of a newsletter generator application, achieving annual cost savings of over \$10,000
- Managed the entire product development lifecycle, ensuring seamless execution of deadlines and key milestones
- Partnered with stakeholders to translate requirements into python data models to align the back-end architecture with system design documentation

Account Manager, Vimeo(Full Time)

Jul' 19 – Jun' 22

- Strategically recommended brand products based on historical usage data, effectively showcasing ROI and overcoming objections to drive over \$1,000,000 in upsell revenue
- Performed deep-dive analysis on account data, including usage trends, sales metrics, and client feedback, to optimize account health and align technical solutions with customer needs
- Led quarterly business reviews for high-value clients, translating complex performance datasets into strategic recommendations and actionable KPIs to drive measurable year-over-year growth

Technical Skills

- Programming - Python, SQL, PostgreSQL, HTML, Typescript, CSS, Tailwind, NestJs, React, NodeJs, MongoDB, Flask
- Software & Tools - AWS, Docker, Postman, Git, Redis, Jupyter Notebook, Storybook
- Packages - NumPy, Pandas, Flask, BeautifulSoup, Numpy, Seaborn, Matplotlib

Education

Bachelor of Arts, English Studies, St. John's University

Dec' 15

Coding Dojo, Certificate of completion

Jun' 21

- Learned web fundamentals and the MERN Stack(MongoDB, Express,React,NodeJs)

Major League Hacking/Meta, Production Engineer Fellowship

Jun' 23

- Worked with Meta Engineers to learn the fundamentals of production engineering

The Knowledge House, Innovation Fellowship: Data Science

Sep'26
